

UK manufactured luxury hardwood bi-fold doors, windows, orangeries and conservatories

Exclusive Hardwood Joinery

From distinctive period homes to contemporary ‘Grand Design’ style new build projects, we offer an extensive range of hardwood products of the highest quality including windows, doors, bi-fold doors, orangeries and conservatories, all designed and manufactured here in the UK by our team of highly skilled craftsmen.

Working exclusively with hardwoods including the finest grade Sapele, Idigbo and Oak amongst many others, all our timber is sourced wherever possible from sustainable FSC accredited suppliers. The finest traditional woodworking techniques and materials are used in combination with the latest engineered timber and computerised CNC machining processes to create elegant, perfectly finished and highly durable made-to-measure joinery that will complement the existing architecture, and transform your home for many years to come.

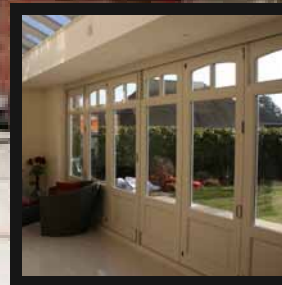

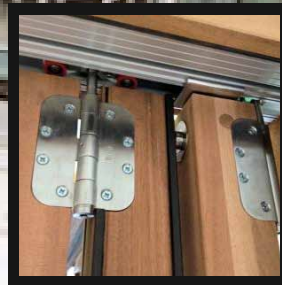

So whatever your joinery requirements, with our extensive range of selected hand crafted timber products and expertise, we can work with you to design and build the perfect solution and turn your vision into a stylish reality.

Bi-folding Doors

If your dream is to transform a kitchen, living or family room by adding a wall of natural light providing a seamless connection to your patio or garden, this can become a reality by using stylish wide opening bi-fold doors which will add a contemporary twist to any property.

Our bi-fold doors are manufactured from engineered hardwoods including Sapele, Idigbo or Oak. We produce them in sizes up to 3 metres high and 15 metres wide, and come complete with 28mm glazing as standard.

All our sliding bi-fold doors have a top rolling system for smooth opening and magnetic retaining catches for compact stacking giving complete opening of the aperture. We also incorporate advanced technical features including multipoint deadbolt and hook locking to master doors.

Conservatories

There's something quite rewarding when it comes to relaxing in a handcrafted hardwood conservatory, designed and built to your bespoke specifications to reflect your ideas and aspirations.

Each natural timber conservatory is built by our skilled craftsmen using traditional methods to deliver a unique addition to your home which will complement the existing architecture and enhance your living environment.

Using high quality natural hardwoods from renewable sources, all our timber is specifically selected for its high quality and fine grain. As well as combining beauty and natural durability, the inherent thermal quality of wood reduces heat loss to a minimum and its rich colour and texture bring a wonderful feeling of warmth to your home.

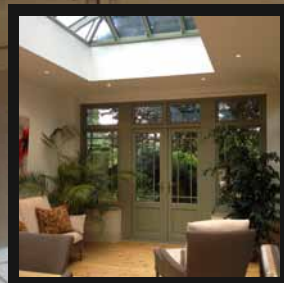

Orangeries

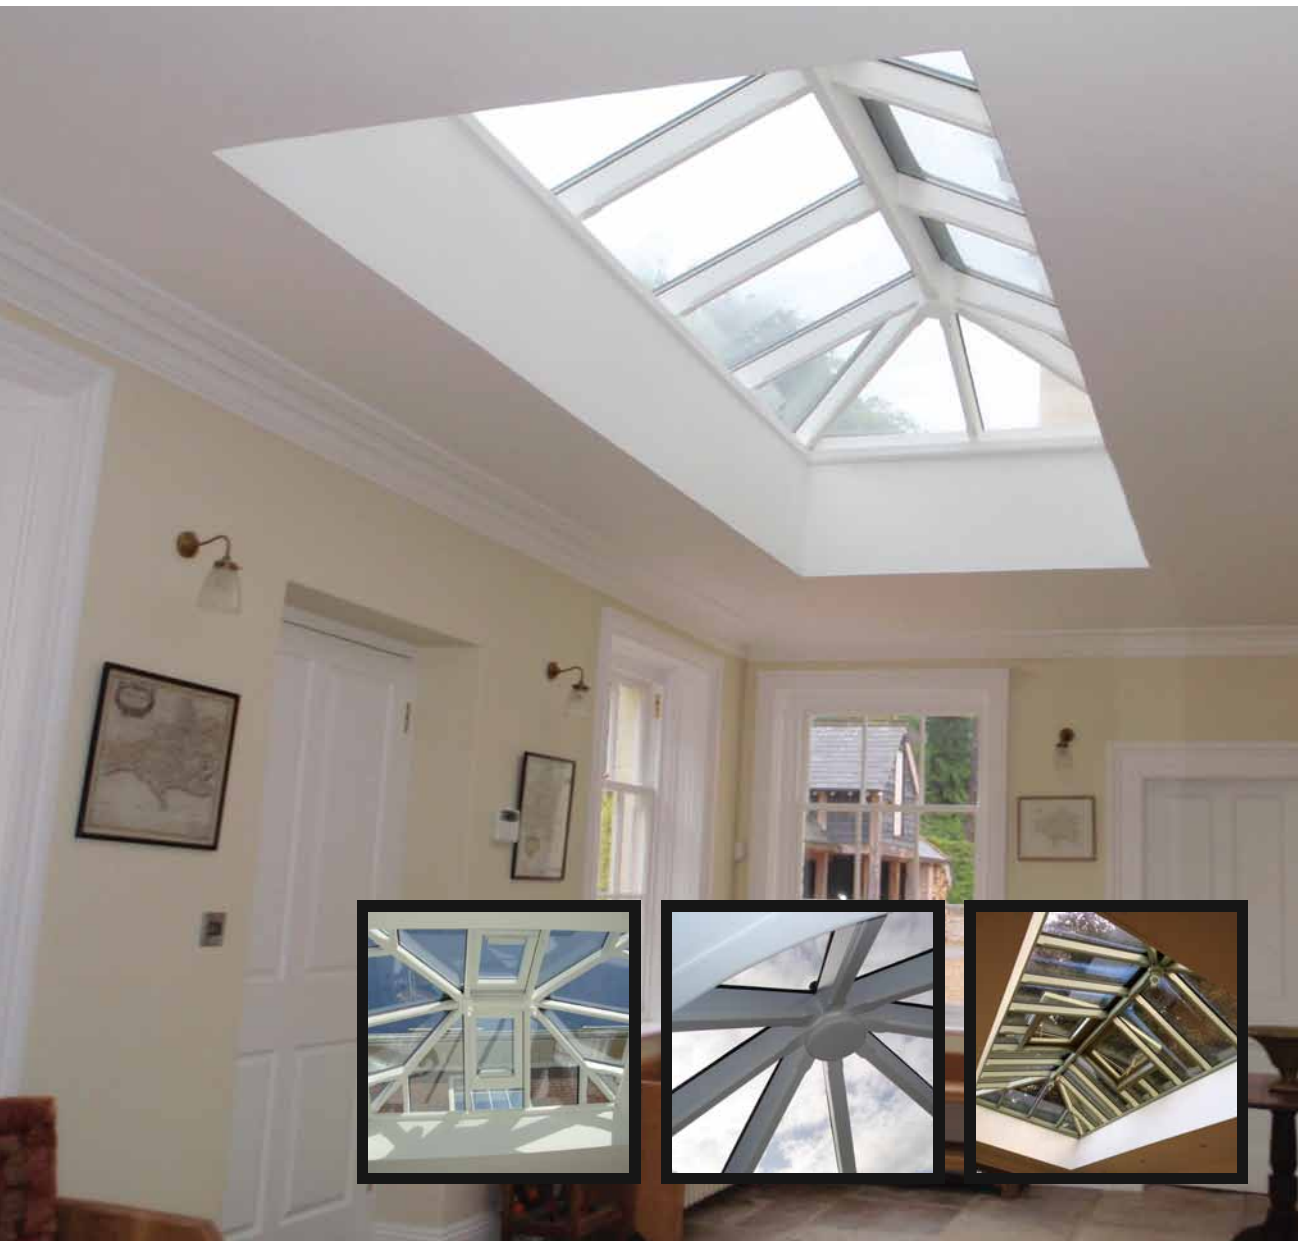

Orangeries continue to enthrall as a timeless classic as well as being an attractive alternative to a more traditional conservatory for adding a stylish living space to your home.

Originally developed in the 17th Century to protect plants over winter, the orangerie has since evolved and is now more popular than ever. Offering the perfect extension to your home, each hardwood orangerie is built using only the finest grade timber and can be finished in an array of colours.

Although often considered the extension choice for listed or period properties, a contemporary orangerie with sleek sliding bi-fold doors can also be a stunning addition for contemporary homes and new build developments.

Roof Lanterns

Traditional hardwood framed roof lanterns are a beautiful and stylish way to bring natural daylight flooding into your home.

Roof lanterns are also a much more efficient way of capturing natural light than traditional windows and they offer huge benefits in large rooms, atriums and orangeries, bringing daylight into the centre of otherwise dimly lit spaces.

Our roof lanterns are extremely versatile and can often be fitted throughout the interior of single storey houses and extensions and on top floors, making your home light, airy and really welcoming.

Sliding Sash Windows

Whether you're looking to replace existing sash windows or considering them as the window solution for your home, hardwood sliding sash windows are manufactured and finished to the highest quality.

All our sash window frames and components are manufactured throughout from Sapele hardwood for a stylish appearance and maximum durability, making them ideal for new build, refurbishment and period properties. We fit 28mm thick low E, argon filled glazed units as standard to provide high thermal performance.

Our windows are available in a wide range of colours, we also offer a choice of leaded and Georgian bar styles, and a great selection of locks, catches and sash lifts to provide you with your very own grand design.

Sustainable and Efficient

Our commitment to energy efficiency and the environment.

Energy efficiency and taking care of the environment are a high priority to us and our customers. All our products are carefully designed to give great energy saving performance and the argon filled double and triple glazing we use are some of the highest insulating glass units available.

All the hardwood we use in our products comes from fully FSC accredited suppliers, guaranteeing that it comes from properly managed and fully renewable sources and that your new windows, doors conservatory or orangery won't cost the earth.

So together, choosing one of our energy efficient designs with high insulation values and FSC timber construction will help reduce your carbon footprint, saving you money on energy bills and helping to protect the environment for future generations.
