

SolidCore Composite Doors

The classic style of a fully sculptured profile

Replacing your front door is a great way of updating your home and personalising your property. It's one of the first things people see and is a focal point for your home.

The Solidcore door is the perfect combination of old and new with the traditional appearance of timber doors and the performance of modern PVCU. The Solidcore Door is made from 16 layers of laminated veneered timber called Kerto and is an attractive alternative to high density foam filled GRP Doors. Timber is naturally renewable and Solidcore timber is purchased from sustainable managed forests and can be recycled.

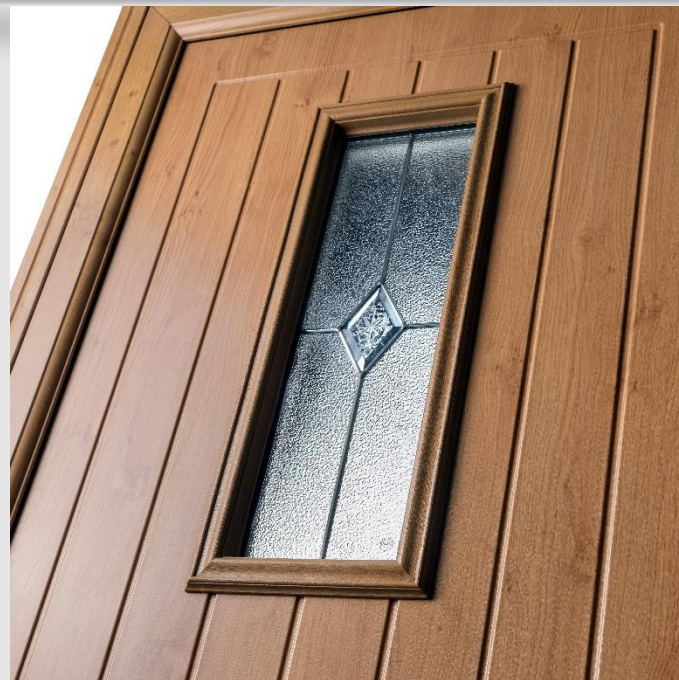

Proven Performance.

Consort Solidcore doors have a unique Veka PVCu skin which perfectly matches the colour and style of our pvc frames and sidelights. It comes as standard with a Security Slam Shut lock featuring 3 deadbolts. Slam Shut locks automatically engage the top and bottom deadbolts when the door closes providing exceptional security and compression.
